

## Advanced Domain Hosting

Mountain Area Information Network offers advanced domain hosting (*www.yourbusiness.com*, *.net* or *.org*) on our secure server for an monthly fee of \$25. This service includes fifty POP accounts\*, an unlimited number of email aliases\*\*, and 1 GB of disk space. There is a one-time set-up fee of \$15 that covers registering a domain name for you or transferring a domain you already own to our server.

Some businesses purchase the alternate domain extensions in addition to their primary, top-level domain. For example, you wish you use the domain *www.yourbusiness.com*, you can also register *yourbusiness.net* and *yourbusiness.org* and have visitors to the *.net* and *.org* domains automatically forwarded to your primary domain. MAIN can provide this domain forwarding service for a \$2 monthly fee per domain in addition to a \$15 per domain registration fee. If you need more than the standard 1 GB of disk space, each additional 50 MB block costs \$1 per month. Additional POP accounts each cost \$1 per month.

Unlike our dedicated directory hosting, domain hosting allows the use of cgi scripts, FrontPage extensions, and secure certificates. Secure certificates require an IP address to be dedicated exclusively to your site and therefore entail an additional \$5 monthly fee. Domain hosting also differs in administration, where you have the ability to assign or change email addresses, rather than by MAIN staff. This allows for more control of your website and gives you the ability to make changes at your convenience.

MAIN will provide technical support only to the site administrator whose name is entered on this form. Others you give permission to use email or upload files to your site will need to seek assistance from your site administrator. Also, MAIN cannot be responsible for technical assistance with third-party products or software.

MAIN reserves the right to modify these rates due to the addition or removal of services or maintenance cost changes. Because you are given access to our computer system, signing this form indicates that you will comply with these terms as well as MAIN's User Policies. In signing this form, you also agree to be responsible for the actions of all those to whom you grant access to our system or the email accounts associated with your domain.

***We encourage you to support your community network by using MAIN as your ISP!***

You can also support MAIN while increasing traffic to your site by adding your website to <http://main.nc.us/resources> and adding a reciprocal link back to MAIN (<http://main.nc.us>) on your site. You're welcome to use the image at <http://main.nc.us/images/animatedm@in.gif> or <http://main.nc.us/images/m@inbutton.gif> as a graphical link.

\* POP accounts are email addresses (*yourname@yourbusiness.com*) with separate mailboxes and passwords.

\*\*Email aliases look like unique email addresses but do not have their own mailbox. They direct mail to an alternate address.

## MAIN Domain Hosting Application Page 2

Organization Name: \_\_\_\_\_  
Full Name : \_\_\_\_\_ Title: \_\_\_\_\_  
In signing, I agree to the hosting terms previously outlined and MAIN's User Policies  
(<http://main.nc.us/about/services/useragreement.pdf>), Signature: \_\_\_\_\_
